Allowable Subject Matter

Claims 1-12 allowed.

Claims 1 and 10 are allowable. Claims 1 and 10 are allowable since the prior art of record does not teach a head controller comprising drive waveform generating means that is configured to vary a potential of the first waveform element according to the environmental temperature without varying a potential of the third waveform element in combination with other features and limitations of claim 1.

Claims 4 and 11 are allowable. Claims 4 and 11 are allowable since the prior art of record does not teach an inkjet recording apparatus comprising drive waveform generating means that is configured to vary a potential of the first waveform element according to the environmental temperature without varying a potential of the third waveform element in combination with other features and limitations of claim 4.

Claims 7 and 12 are allowable. Claims 7 and 12 are allowable since the prior art of record does not teach an image recording apparatus comprising drive waveform generating means that is configured to vary a potential of the first waveform element according to the environmental temperature without varying a potential of the third waveform element in combination with other features and limitations of claim 7.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwamura et al. (US 6467865 B1) disclose simultaneously increasing or decreasing the driving voltages V1 and V2 in accordance with ambient temperature changes (Fig. 8). Sayama et al. (JP 11-268266) disclose varying the potential of the third waveform element according to environmental temperature without varying a potential of the first waveform element.
